PROFESSIONAL SUMMARY

DevOps Engineer with 3 years of Linux and DevOps experience at Slovak Telekom and Deutsche Telekom IT Solutions, including 1.5 years full-time supporting a production OTT (internet TV) platform. Hands-on with Kubernetes deployments via ArgoCD and GitLab, Linux server administration (Rocky Linux, RHEL, CentOS), log analysis in Elasticsearch/Kibana, and ITIL-based incident and change management. Ing. (Master's) in Information Management; fluent in English (B2).

WORK EXPERIENCE

DevOps Engineer – Triton Digital a.s. (contracted to Slovak Telekom) **05/2025 – Present**
Bratislava, Slovakia | Full-time engineer in Slovak Telekom's TV department, continuing from trainee role

- Administer Rocky Linux servers powering Slovak Telekom's OTT TV platform, performing OS installation, patching and updates.
- Deploy development teams' Kubernetes modules to production through GitLab and ArgoCD.
- Resolve customer-reported internet TV incidents, using Elasticsearch and Kibana to troubleshoot and identify root causes.
- Build AI proof-of-concept features for the internet TV product, including training custom models and developing MCP (Model Context Protocol) servers.
- Query and maintain Oracle Database data supporting platform operations.
- Serve on a one-week on-call hotline rotation and carry out overnight maintenance windows to minimize customer impact.

TV Trainee Specialist (DevOps) – Slovak Telekom **10/2024 – 05/2025**
Bratislava, Slovakia | Part-time, OTT TV platform

- Installed, configured and patched Linux servers supporting the OTT TV service.
- Deployed application modules to Kubernetes clusters using ArgoCD and GitLab.
- Resolved customer tickets related to internet TV service availability and functionality.
- Took part in developing new AI-based features for internet TV in the development environment.

ICT Administrator (Linux) – Deutsche Telekom IT Solutions **03/2023 – 03/2024**
Košice, Slovakia | Part-time

- Independently reviewed, created and resolved ITIL incident and change tickets in ServiceNow within agreed SLAs.
- Administered RHEL and CentOS servers hosted on VMware and Microsoft Azure.
- Followed incident (INM) and change management (CHM) processes to maintain stable customer service.

EDUCATION

Ing. (Master's), Information Management – University of Economics in Bratislava **09/2023 – 05/2025**
Relevant coursework: Distributed Technologies, Big Data, Machine Learning, Software Engineering, Business Intelligence, Information Systems Management, Project Management

BSc, Business Informatics – Technical University of Košice **09/2020 – 06/2023**
Relevant coursework: Algorithms and Programming, Database Systems, Web Development, Data Analytics, Information System Design
